FOCUS OF THE ETES - 2026

The conference will focus on discussing the present & upcoming modern technologies & smart digital systems to integrate transformation & automation for improving the performance of various electrical equipment & systems.

It will be a transformative event for useful interaction among Indian and global manufacturers, dealers, buyers, and professionals in the fields of electrical, power, & energy. The technical experts of the respective areas will explore on new systems and noteworthy developments so as to pave the way for business expansion & corporate collaborations.

Artificial Intelligence, Machine Learning & Digital technologies are the need of today. Integrating these with the existing systems will surely bring a sea change in the overall performance of all industrial units whether small or large in the PSU or private sector industries.

Think, Ink and Link

WHY PARTICIPATE ?

01

BRAND VALUE

Taking part in international conferences, expos, and awards is a potent means of establishing your brand presence on a global scale. It distinguishes your organization as an industry leader and also garners domestic and international recognition.

02

NETWORKING

Networking is an investment in your future and in yourself. The connections you establish today have the potential to provide you with opportunities that can propel your career to exceptional heights.

03

MARKET RESEARCH

Being a part of the events encourages professionals to push their limits and showcase their talents in order to gain recognition on a global platform. This instils a sense of pride and accomplishment within the realm of market research.

Sub-Topics for the Discussions

- Next-Generation Power Transformers: AI-Driven Asset Intelligence, Monitoring & Lifecycle Optimization
- Intelligent Transmission & Distribution Networks: Enhancing Grid Resilience Through AI and Advanced Analytics
- Smart Testing, Measurement & Diagnostics: Enabling Predictive Asset Performance Management
- Digitalization and Sustainable Innovation in the Wires & Cables Ecosystem
- Advanced Electrical & Fire Safety Systems: AI-Enabled Risk Assessment, Detection & Mitigation
- Intelligent Earthing and Ground Fault Management for Critical Electrical Infrastructure
- Industrial Automation 4.0: AI, Industrial IoT and Autonomous Control Systems for Operational Excellence
- Power Quality Analytics: AI-Driven Harmonic Mitigation, Energy Efficiency & Equipment Reliability
- Intelligent Control Panels & Smart Switchgear: Advancing Digital Protection, Monitoring and Power Distribution
- Advanced Metering Infrastructure (AMI): Smart Metering, Data Intelligence & the Evolving Utility Landscape
- Artificial Intelligence, Machine Learning & Digital Twins: Transforming the Future of Electrical and Power Systems

Topics

Power
Transformer

1

Transmission &

Why You Should Attend the Electrical Systems Conference 2026: Fascinating Facts That Spark Action?

The Electrical Systems Conference 2026 goes beyond theory—it's a platform for action. Each focus area reflects the pressing need to transition to smarter, cleaner, and more resilient energy systems that can meet the demands of an interconnected world.

This conference will give you access to exclusive insights, hands-on workshops, and opportunities to collaborate with global pioneers and innovators. Whether you're leading an industry initiative, driving research, or just passionate about the future of energy, this event is your chance to help shape the next era of electrical systems.

Join the movement, contribute to the conversation, and help power a sustainable tomorrow.

The **ELECTRICAL MIRROR** Magazine: Reflecting the Future of Innovation!

An outlook of the Electrical & Power Industry

In a world where technology constantly shapes the way we live, work, and interact, The Electrical Mirror Magazine stands as a beacon of insight, illuminating the rapidly evolving landscape of electrical engineering, energy, and innovation. More than just a publication, it's a reflection of the future.

The Electrical Mirror Magazine is your portal to the dynamic world of the electrical and power industries. Reflecting the latest in energy solutions, grid innovations, and power systems, it captures the pulse of a rapidly evolving sector. From sustainable power sources to the technology shaping the future of electricity, each page sparks new ideas and insights. Stay informed, stay ahead, and see the future of power in The Electrical Mirror.

The Electrical Mirror captures the heartbeat of the industry. With each page, readers are transported into a world where sustainability meets efficiency, and visionaries drive change with every wire and current.
